

Are you passionate about the science of rehabilitation?

Join the **Rehabilitation Scientific Circle** — a vibrant academic community for students eager to deepen their knowledge, engage in real research, and cooperate with like-minded peers.

As a member, you will explore a wide range of current and emerging topics, including:

 Neurorehabilitation

 Choosing the right prosthetics

 Technological innovation in rehabilitation

You'll also benefit from the direct mentorship of **Prof. dr hab. n. med. Ireneusz M. Kowalski**, who actively supports students in developing and publishing scientific papers — a unique opportunity to gain experience in academic writing and evidence-based thinking.

Whether you're considering a future in research, clinical practice, or medical innovation, this is your chance to:

- ☒ Build your academic and professional network
- ☒ Strengthen your CV
- ☒ Immerse yourself in meaningful scientific exploration

 Join us and be part of a community shaping the future of rehabilitation science.
