

Anatomy 2026/2027

02.10.2026	Friday	Lecture	Upper and lower limbs
06.10.2026	Tuesday	Regulations and policies. Introduction to anatomy. General Terms: planes and axes, terms of direction and relation, lines used for the body description. General terms used for bones, the shape of bones. Bones, joints and ligaments. Varieties and classification of synovial joints. Types of movements., Vertebral column: primary and secondary curvature.	
08.10.2026	Thursday	Lecture	
08.10.2026	Thursday	Regions of the upper limb. Shoulder: bones, muscles, bursa and fascia. Nerves and vessels of the shoulder. Topographical elements of the shoulder. Spinal nerve and brachial plexus. Clinical and radiological anatomy. Axilla	
13.10.2026	Tuesday	Arm: bones, muscles, bursa and fascia. Nerves and vessels of the arm. Topographical elements of the arm. Clinical and Radiological Anatomy.	
14.10.2026	Wednesday	Practical classes based on the Flipped Spotters model	
15.10.2026	Thursday	Forearm: bones, joints and ligaments of the forearm. Muscles, fasciae, nerves and vessels of the forearm. Clinical and Radiological Anatomy.	
15.10.2026	Thursday	Lecture	
20.10.2026	Tuesday	Hand: bones, joints and ligaments of the hand. Muscles. Fasciae. Nerves and vessels. Clinical and Radiological Anatomy.	
21.10.2026	Wednesday	Practical classes based on the Flipped Spotters model	
22.10.2026	Thursday	Upper Limb – review	
22.10.2026	Thursday	Lecture	
27.10.2026	Tuesday	Bones, joints, and ligaments of the pelvic girdle. Muscles, vessels, and nerves of the pelvic girdle. Topographical elements. Clinical and radiological anatomy.	
28.10.2026	Wednesday	Practical classes based on the Flipped Spotters model	
04.11.2026	Wednesday	Practical classes based on the Flipped Spotters model	
05.11.2026	Thursday	Lecture	
05.11.2026	Thursday	Bones, joints and ligaments of thigh. Muscles, vessels and nerves of thigh. Topographical elements. Clinical and radiological anatomy.	
10.11.2026	Tuesday	Bones, joints and ligaments of the leg. Muscles, vessels and nerves of leg. Topographical elements. Clinical and radiological anatomy.	
12.11.2026	Thursday	Bones, joint and ligaments of foot. Muscles, vessels and nerves. Topographical elements. Clinical and radiological anatomy.	
17.11.2026	Tuesday	Lower Limb – review	
18.11.2026	Wednesday	Practical classes based on the Flipped Spotters model	
19.11.2026	Thursday	Upper and Lower Limb – Review	
19.11.2026	Thursday	Lecture	
24.11.2026	Tuesday	Upper and Lower limb – Review	
25.11.2026	Wednesday	Upper and Lower limb – pre-TOSSPE	
26.11.2026	Thursday	CREDIT 1 – Upper and lower limbs	
01.12.2026	Tuesday	Regions of the back. Vertebral column. Bones. Muscles, bursa, and fascia of the back. Nerves and vessels of the back. Topographical	Th

		elements of the back. Clinical and Radiological Anatomy.	
02.12.2026	Wednesday	Practical classes based on the Flipped Spotters model	
03.12.2026	Thursday	Vertebral Column and skeleton of the thoracic cage. Breast. Thoracic wall. Muscles, vessels, nerves.	
03.12.2026	Thursday	Lecture	
08.12.2026	Tuesday	Lungs. Bronchopulmonary segments. Bronchi. Pleural cavity and pleura. Clinical and Radiological Anatomy	
09.12.2026	Wednesday	Practical classes based on the Flipped Spotters model	
10.12.2026	Thursday	Heart. Pericardium. Vessels and nerves of the heart. Clinical and Radiological Anatomy.	
15.12.2026	Tuesday	Mediastinum. Clinical and Radiological Anatomy	
16.12.2026	Wednesday	Practical classes based on the Flipped Spotters model	
17.12.2026	Thursday	Thorax – Review	
17.12.2026	Thursday	Lecture	
22.12.2026	Tuesday	Cervical vertebrae. Occipital bone. Atlanto-occipital joint, ligaments, and movements. Scapula and clavicle. Sternoclavicular joint and acromioclavicular joint. Ligaments and movements. Nuchal region.	
12.01.2027	Tuesday	Muscles of the neck and nuchal muscles: innervations, origin and insertion, and function.	
13.01.2027	Wednesday	Practical classes based on the Flipped Spotters model	
14.01.2027	Thursday	Larynx: muscles, cartilages, joints, innervations, blood supply. Lymphatic vessels and nodes of the larynx. CN X. Laryngopharynx.	
19.01.2027	Tuesday	Thyroid gland. Parathyroid glands. Pharynx. Vessels of the neck. Triangles of the neck. Spinal nerve. Cervical plexus, accessory nerve (CN XI). Radiological and clinical anatomy of neck.	
20.01.2027	Wednesday	Practical classes based on the Flipped Spotters model	
21.01.2027	Thursday	Neck – review	
26.01.2027	Tuesday	Thorax, Back, and Neck – Review	
27.01.2027	Wednesday	Thorax, Back, and Neck – Review – pre- TOSSPE	
28.01.2027	Thursday	CREDIT 2 – Back, Thorax, and Neck
